EXPERIENCE

Freelance web Developer

2024 - Present

- Developed custom websites tailored to client requirements, ensuring functionality, responsiveness, and user-friendly design.

SKILLS

Javascript/Typescript:	can code efficient algorithms in either
UI/UX Proficiency in:	Tailwind, Framer Motion, ShadCN
Reactjs:	Proficient in State/Context Management
Nextjs:	Can create swift and reliable websites
Expressjs:	Capable of building servers that expose both RESTful APIs and WebSockets .
Database management:	can work efficiently in both SQL and NoSQL databases
Monorepo/Turbopack:	Can create a structured and swift building repository

PROJECT

Food Delivery App *Reactjs, Tailwind CSS, FastAPI, JWT Auth, Stripe, Leaflet, Vercel, REST API*

<https://foodie-6voopyd7o-adnans-projects-a8f6b193.vercel.app/>

Designed and developed Foodie, a fully custom end-to-end food ordering platform built from scratch.

Integrated Stripe for secure online payments and Leaflet.js for real-time order tracking with interactive maps.

Engineered a responsive, mobile-first UI using React.js (Vite) and Tailwind CSS, connected to a FastAPI

backend via Axios. Built a custom admin dashboard with menu, order, and user management features,

powered by JWT-based role-based authentication. Optimized app-wide state with React Context API,

deployed frontend on Vercel, and secured backend API on a personal domain. Delivered a seamless user

experience while mastering the complete product lifecycle without relying on templates or clones
